

RESEARCH — customer / vertical / competition intel

- g-intel-pipeline** — the master orchestrator; runs the full research package end to end, resumable.
"run the pipeline on [Company]"
- g-intel-deep** — first deep-dive research cycle on a new prospect.
"research [Company]" / "deep dive on [client]"
- g-intel-customer** — the 5-step deep cycle — financials, platform, insider knowledge, market, case studies. Reserve for top-ranked accounts.
"customer intel on [Company]"
- g-intel-dossier** — narrative account story + relationship map (org chart).
fired automatically inside the pipeline
- g-intel-fanout** — scans research/transcripts for named competitors/vendors, researches each.
"research all the competitors mentioned"
- g-intel-qbr** — quarterly business review prep — internal signal + industry + peer + tech-frontier triangulation.
"prep QBR for [Account]"
- g-intel-factcheck** — verifies every claim in an intel file against external sources — mandatory before a POV.
"fact check [file/directory]"
- g-intel-dispatch** — parallel research fan-out across many prospects at once (cloud agents).
"research all 10 credit-union targets"
- g-intel-flywheel** — extracts patterns that repeat across 2+ clients into reusable playbooks — the cross-chain multiplier (\$1a).
"what patterns are we seeing across clients"

PRODUCT / AI-OPPORTUNITY

- g-pm-jtbd** — scores a client's under-served outcomes (Ulwick ODI) — finds where AI actually pays off.
"what AI opportunities does [Client] have"
- g-pm-grow** — grows scored opportunities into a roadmap + narrative (RICE×Kano + Thompson + MDI).
"what should we build and pitch to [Client]"

THIS SALES ENGINE — spec 006's new components

- g-sales-engine** — the router — any sales intent, fires the right job. Working — routes to g-sales-prospect/g-sales-pov/g-intel-*.
"who should I focus on this week" / "status" / "pipeline"
- g-sales-prospect** — confidence-scored shortlist under a capacity ceiling, protected floor per motion. Working + tested.
python score.py --rank --opportunities-file ... --capacity 8 --floor "hunt=3,expand=2"
- g-sales-pov** — synthesizes a testable Point of View / Business Value Hypothesis. Stage 1 (curated provocations) + job-5 verification gate: working + tested. Stage 2 (flywheel synthesis) gated behind Stage 1 field signal.
"build a POV for [target]"
- kpi.py / eval_backtest.py** — portfolio scorecard + the method of eval — Briar score, calibration, pattern reuse rate, case-study yield.
python kpi.py --opportunities-file ... --quota-hunt ...

EXISTING SALES POINT-TOOLS

- g-sales-pack** — presales assembly + close support, objection handling.
"put together a presales pack for [deal]"
- g-sales-pitch** — content strategy for a sales deck — what the slides should say, before building them.
"help me pitch [Client] on [solution]"
- g-sales-engagement-proposal** — client-facing engagement proposal (.docx), Tavant consultative style.
"write a proposal for [Client]"
- g-sales-distill** — sharpens the sales-pattern playbook after meetings — run weekly.
"distill sales" / "/g-sales-distill"

PRESENTATION

- g-create-deck / g-create-pptx** — build and edit client-facing slide decks.
"build a deck for [Client]"
- g-create-explainer** — persuasive multi-section PDF — describes first, argues last, names the trade-off.
"make the case for [architecture/idea]"
- g-create-design** — visual design pass on an existing deck.
fired as part of deck-building

GOVERNANCE (fires automatically, \$7 — not manually invoked)

- g-gov-guard** — redacts/masks CRM PII before it's used anywhere.
- g-gov-attest** — tamper-evident, hash-chained decision ledger — the backtest substrate.

AGENTS

- ai-solution-thinker** — structures a new AI-solution design from a raw pain point. Powers g-sales-pov's synthesis.
"discovery call tomorrow — help me structure an approach"

AUTOMATION (runs on its own — nothing to type)

- Hermes heartbeat** — every 30 min: morning brief, portfolio monitor, weekly review, pattern extraction (spec \$6).
